HIGH-GRADE INTERSECTIONS FROM PHASE 2 UNDERGROUND DRILLING PROGRAMME AT SAN JOSE MINE IN DECEMBER QUARTER

HIGHLIGHTS

- Assays from underground drilling have identified new zones of highgrade zinc mineralisation in the Central Zone of the San Jose Mine
- Intense massive sulphide mineralisation intersected in previously untested
 168 Trend
- These intersections extend known mineralisation in the 168 Trend, which remains open
- Infill drilling in the centre of Los Caracoles Trend has continued to intersect mineralisation below the main gallery level
- Assay results from 12 diamond drill holes completed in the Los Caracoles and 168 Trend are expected imminently; most holes exhibit positive visual zinc mineralisation
- The drill programme is being ramped up, with an additional drill-rig being deployed through a second drilling contractor to test step-out targets and extensions
- Phase 2 drilling campaign metreage upsized
- Two highly qualified technical advisory professionals were appointed to the Variscan technical team; Dr. Simon Doring and Dr. Duncan Large
- A surface drilling permit over the Buenahora license area has been granted by the Government of Cantabria's Department of Mines local municipal approvals are well-advanced
- Surface drilling will run concurrently with the Phase 2 underground drilling programme already underway

Variscan Mines Limited ("Variscan" or the "Company" or the "Group") (ASX:VAR) is pleased to provide its Appendix 5B for the quarter ended December 31 2021 along with the following operational update.

During the quarter, the Company continued to receive strong assay results from the Phase 2 underground diamond drilling programme at its San Jose Mine located in Cantabria, northern Spain.

OPERATIONS

SPAIN - NOVALES-UDIAS ZINC PROJECT

Strategy

Variscan has a clear strategy to execute the 2-fold opportunity that the Novales-Udias project presents:

- 1. Quantify near term zinc production opportunities at the San Jose-Novales Mine
- 2. Define a regionally significant mineral resource similar in size and grade to the former producing and proximal Reocín Mine

Symbol Legend Simplified Lithology Legend Historical Galleries Quaternary Sediments **Novales Mining Permit** Sandstones (Penosas Fm.) **Buenahora Exploration** Limestones (Cuchia Fm.) Figure 1. Novales-Udias Project proximal to Reocín Mine

New zones of high-grade zinc intersected at San Jose Mine

In December, Variscan announced that assays from underground drilling had identified new zones of high-grade zinc mineralisation in the Central Zone of the San Jose Mine.

The highlights of these discoveries include:

168 Trend

- High-grade zinc mineralisation in the previously untested 168 Trend:
 - DDH NOVDDT003: 8.0m @ 20.17% Zn
 - Including 5.0m @ 24.92% Zn
 - o DDH NOVDD085: 9.0m @ 8.73% Zn
 - o DDH NOVDD1005: 9.0m @ 8.73% Zn
 - o DDH NOVDDT001: 2.8m @ 17.86% Zn
 - o DDH NOVDD086: 4.0m @ 8.93% Zn
 - o DDH NOVDDT002: 2.0m @ 15.42% Zn
- 168 Trend remains open with significant potential for further extensions

Los Caracoles Trend

• Assays from the Los Caracoles Trend have continued to extend high-grade mineralisation in a southerly direction below the main gallery level:

```
    DDH NOVDD077: 8.0m @ 5.16% Zn
    DDH NOVDD079: 6.0m @ 5.02% Zn
    DDH NOVDD077B: 6.0m @ 5.41% Zn
    DDH NOVDD078B: 5.0m @ 6.00% Zn
```

 Potential for +400m extension of this trend based on assay results and visual estimates of drilling conducted so far.

Importantly, these intersections extend known mineralisation in the 168 Trend, which remains open.

Infill drilling in the centre of Los Caracoles Trend has continued to intersect mineralisation below the main gallery level. Assay results from the next batch of 12 diamond drill holes completed in the Los Caracoles and 168 Trends are pending.

Following these strong results, the drilling programme is being ramped up, with an additional drill-rig deployed through another drilling contractor to test step-out targets and extensions as well as the Phase 2 drilling campaign metreage being upsized.

While the current drill programme still has a way to run, it has already revealed:

- the presence of laterally extensive mineralised lenses above and below the main gallery level
- mineralised lenses assessed to be more contiguous and wider in some areas
- significant areas of the Central Zone are assessed to be under-exploited with potential for further discoveries
- Extension of drilling on Los Caracoles Trend has successfully intersected mineralised lenses below the main gallery level increasing the strike length in this area by a further 200m
- Continuing validation of the conceptual model of the San Jose Mine as a multi-layered deposit, consisting
 of multiple vertically stacked, sub-horizontal high-grade mineralised lenses of variable thickness,
 separated by intervals of dolostone. This is consistent with the generally stratabound character of sulphide
 orebodies in MVT Pb-Zn districts¹

For further details, see the ASX announcement dated 20 December 2021.

Next Steps

Variscan's immediate focus is progressing with underground drilling now underway at the San Jose Mine and returning results from the latter campaign as soon as possible.

Additionally, the Company will be advancing a number of follow-up activities and deliverables including:

- A geophysical survey has been completed of surface drill targets over the Buenahora license area with results expected shortly
- Local municipal approvals for the surface drilling application covering the Buenahora license area
- A surface drilling campaign to test step out extensions in the vicinity of the San Jose Mine
- Delivering the licence renewal application pending over the Guarajaz Project

Project Summary

The Novales-Udias Project is located in the Basque-Cantabrian Basin, some 30km southwest from the regional capital, Santander. The project is centred around the former producing San Jose underground mine with a large

¹ Rong Ma (2018) 'Study on geological features and exploration methods of MVT Pb-Zn deposits' IOP Conf. Ser: Earth Environ. Sci. 108 032010

surrounding area of exploration opportunities for a number of satellite deposits based on underground and surface workings, our substantial database of some 88,000m of historic drilling and multiple areas of zinc anomalism identified from recent and historic geochemical surveys. Variscan has defined the NE-SW Novales Trend over 9km with a parallel mineralised trend over at least 3km of strike.

Novales-Udias Project Highlights

- Near term zinc production opportunity (subject to positive exploratory work)
- Large tenement holding of 68.3 km² (including several granted mining tenements)
- Regional exploration potential for another discovery analogous to Reocin (total past production and remaining resource 62Mt @ 8.7% Zn and 1.0% Pb^{2, 3})
- Novales Mine is within trucking distance (~ 80km) of the Asturias zinc smelter
- Classic MVT carbonate hosted Zn-Pb deposits
- Historic production of high-grade zinc; average grade reported as $\sim 7\%$ Zn⁴
- Simple mineralogy of sphalerite galena calamine
- Ore is strata-bound, epigenetic, lenticular and sub-horizontal
- Reported historic production of super high grade 'bolsas' (ore bags) commonly 10-20% Zn and in some instances +30% Zn⁵
- Assay results of recent targeted grab samples taken from within the underground Novales Mine recorded 31.83% Zn and 62.3% Pb⁶
- Access and infrastructure all in place
- Local community and government support due to historic mining activity

SPAIN — GUARAJAZ ZINC-RICH POLYMETALLIC PROJECT

- Grab samples collected during follow-up geological field work in the previous quarter at Variscan's zincrich polymetallic Guarajaz Project in central Spain
- Assays from these grab samples returned high-grade zinc, lead and silver results
- Significant assay results with these samples included:
 - o 11.5% Zn, 4.6% Pb, 248ppm Ag
 - o 7.8% Zn, 3.7% Pb, 0.9% Cu, 278ppm Ag
 - o 7.5% Zn, 4.6% Pb, 115ppm Ag
 - 3.6% Zn, 4.1% Pb, 218ppm Ag
 - o 3.0% Zn, 2.5% Pb, 81ppm Ag 2021
- Variscan has submitted an application for a 3-year extension of its exploration license at the Guarajaz Project. See the ASX announcement 27 September 2021.

⁶ Refer to ASX Announcement of 19 December 2019

CHILE - ROSARIO COPPER PROJECT

The Rosario Project is located approximately 120 kilometres by road east of the port city of Chanaral in the Atacama Region of northern Chile. Chile is a proven mining jurisdiction and is the largest producer of copper globally. The Rosario project lies about 20 kilometres north of the El Salvador mine (owned by Codelco). It is one of the country's larger copper operations, within a region of dense mining activity (all scales) and good copper endowment.

The Rosario project comprises three granted exploitation concessions, Rosario 6, Rosario 7 and Salvadora, one granted mineral exploration licence (Abandonara) and an exploration concession under application (Rosario 101). These concessions cover two outcropping copper trends (Zones A and B) over a combined strike length of approximately 6 kilometres.

As a result of the impact of the continuing worldwide COVID-19 epidemic, no significant activities were conducted on the Rosario Copper project during the Quarter.

AUSTRALIA

The Company continues to hold minority interests in a number of areas of eastern and central Australia. No specific activities were undertaken by the Company in these areas during the quarter.

FINANCIAL & CORPORATE

CASH

Cash at bank at the end of the quarter was \$3.58 million.

SUMMARY OF EXPENDITURE ON EXPLORATION ACTIVITIES

For the quarter, the Group spent \$353,000 on exploration activities, substantively all of which related to the Group's Spanish zinc projects. These exploration activities related to:

- Underground drilling programme;
- Structural geological mapping;
- Technical consulting fees;
- Geological mapping;
- Tenement administration, reporting and management; and
- Directly-attributable corporate overheads and administration costs.

In accordance with ASX Listing Rule 5.3.2, the Company advises that no Mining Development or Production activities were conducted during the quarter.

SHARE CAPITAL

The total number of shares on issue at the end of the quarter was 266,732,024.

Deferred settlement shares

In accordance with the acquisition of the Spanish Zinc projects, the Company must issue additional shares upon the satisfaction of certain exploration milestones. These milestones are for the definition, in accordance with JORC 2012, of an Inferred Mineral Resource (or greater) of:

- Milestone 1: 4 million tonnes at 7% Zn
- Milestone 2: 8 million tonnes at 7% Zn

Upon satisfaction of each of these milestones, the Company must issue 27,500,000 ordinary shares to the vendors of Slipstream Spain Pty Ltd and Slipstream Spain 2 Pty Ltd, and 2,426,471 shares to Hispanibal S.L. as the vendor of the "Hispanibal Option", for a total of 59,852,941 Ordinary Shares if both milestones are met.

There is currently no obligation to issue the milestone shares.

COVID-19

Variscan continues to adopt a proactive and pragmatic approach to the COVID-19 pandemic and will continue to operate in full compliance with the regulations to safe-guard the health of our staff and contractors as well as the local communities. The Company's planned exploration work is continuing as previously advised.

OTHER

During the current Quarter the Company made payments to related parties of \$44,000, represented by remuneration paid to Directors.

Variscan Mines Managing Director & CEO Stewart Dickson said: "We have made excellent progress at the San Jose Mine during the December quarter, with strong results giving us the confidence to expand our drilling programme. We look forward to receiving further assay results from drilling at the 168 and Los Caracoles trends and updating the market on our significant drilling campaign. Variscan remains ideally-placed to take advantage of the favourable market dynamics and future outlook for zinc, which was recently classified as a critical metal by the US Government."

ENDS

Variscan Mines Limited

Stewart Dickson

Managing Director & CEO

info@variscan.com.au

This announcement has been authorised by Mr Stewart Dickson, Managing Director and CEO of Variscan Mines Limited

BACKGROUND

Variscan Mines Limited (ASX:VAR) is a growth oriented, natural resources company focused on the acquisition, exploration and development of high quality strategic mineral projects. The Company has compiled a portfolio of high-impact base-metal interests in Spain, Chile, and Australia.

The Company's name is derived from the Variscan orogeny, which was a geologic mountain building event caused by Late Paleozoic continental collision between Euramerica (Laurussia) and Gondwana to form the supercontinent of Pangea.

COMPETENT PERSONS STATEMENT

Where Company refers to exploration results and historical data previously advised to the ASX it confirms that it is not aware of any new information or data that materially affects the information included in previous announcements and all material assumptions and technical parameters disclosed in those announcements continue to apply and have not materially changed.

- Note 1: Under an agreement with Silver City Minerals Limited, Broken Hill Operations and Eaglehawk Geological Consulting Pty Ltd Variscan has converted its interest in parts of these tenements to a NSR (Net Smelter Return).
- Note 2: Marmota has earned 100% of the uranium rights only in EL 5682. Variscan has a 0.5% net profits royalty on production from a uranium mine.
- Note 3: The remaining exploration licences owned by Variscan Mines SAS (excluding the Couflens PER) have been conditionally acquired by a new wholly owned subsidiary, Variscan Mines Europe Limited. Pursuant to the approval for the Subsidiary Sale, the Ministry of Economy and Finance has imposed, without prior consultation, the compulsory relinquishment of the remaining licences. The Company has approved the relinquishment request and has yet to receive a response. The timetable for the completion of the relinquishment process is unknown.
- Note 4: On 1 July 2019 the Company announced it had successfully renegotiated the terms of the existing Option Agreement to provide the Company with a participating interest of 10.4%. The Company can earn up to 90% of the project through payment of amounts totaling approximately US\$2.25 million.

Notes

- This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- 5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
